

# Owl Paper Bag Puppet

Template and Instructions

## Materials

Owl Template  
12" x 6" Lunch Size Paper Bag  
Construction Paper  
Scissors  
Glue Stick

## Instructions

Step 1 - Cut the all of the pieces from the template. You may choose to purchase transfer paper and transfer the pieces to the construction paper. Doing so would eliminate the need to cut the template.

Step 2 - Cut the yellow body and head pieces, and glue them to the paper bag.

Step 3 - Next, cut the yellow eye feathers, and glue them to the head piece.

Step 4 - Cut the orange, white and brown eye pieces, and glue them together.

Step 5 - The nose is made of three pieces of paper. The primary part is orange. The other two parts include a small red piece on the left side of the beak, and a brown piece that is glued behind the orange piece to create a shadow on the right side of the beak. Cut those pieces out, and glue them together.

Step 6 - Cut the chest feathers and arrange them in pattern that seems interesting.

Step 7 - Lay all of the pieces in place, and glue.

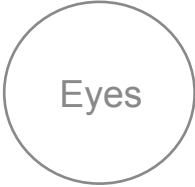

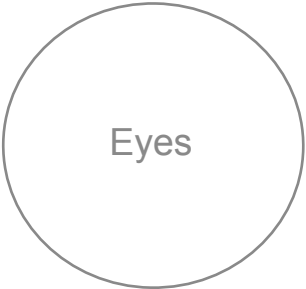

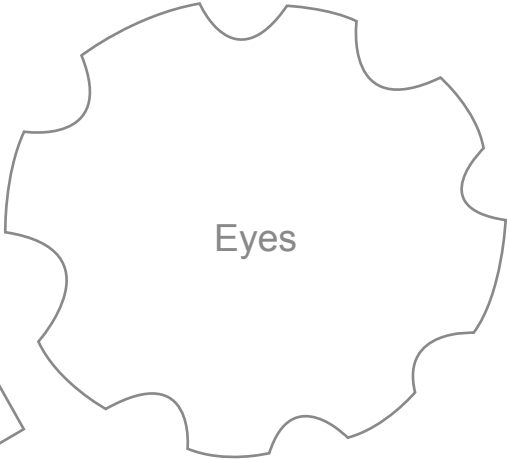

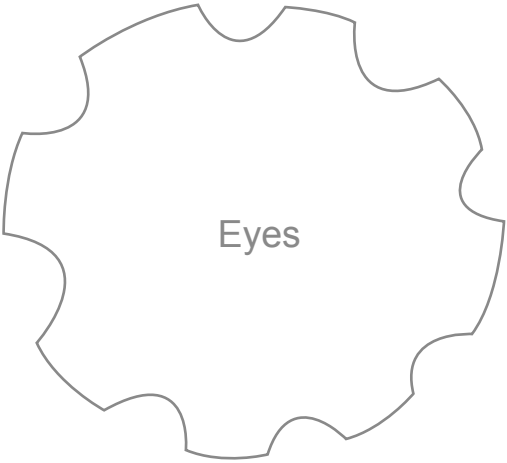

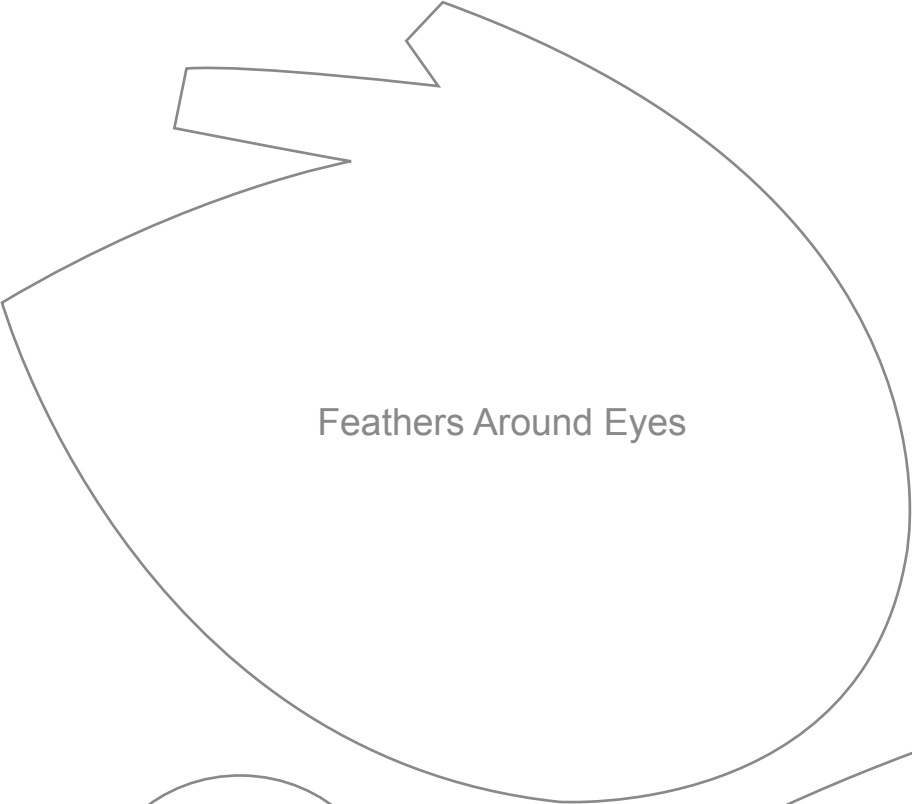

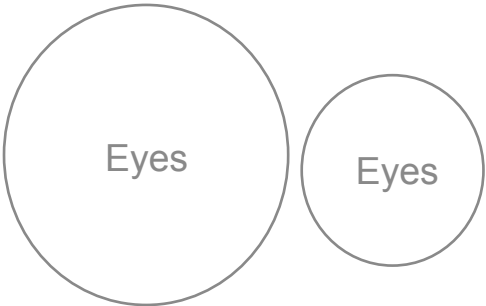

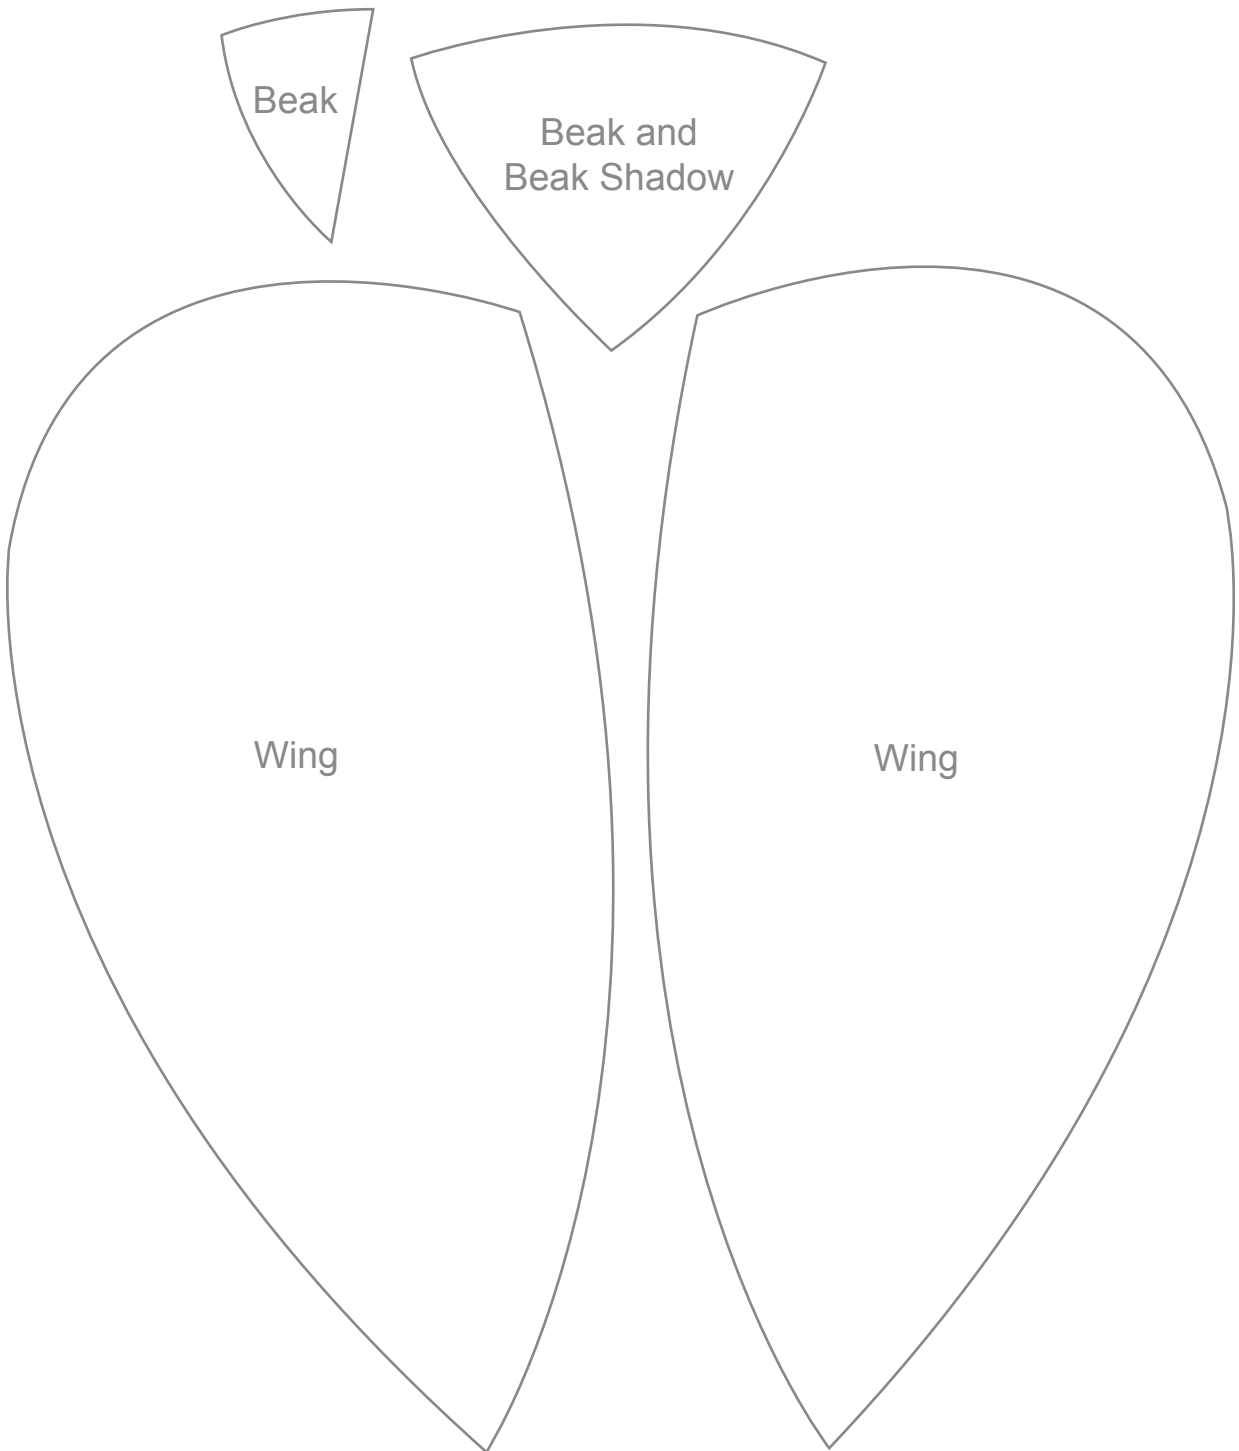

Chest

Head

(In an effort to save paper, the head template is included on this page. Cut the chest template out first, and create this piece from construction paper. Then cut the head template, and create that piece from construction paper.)

The small feathers are left up to your own creativity. Make every one just a little different, and experiment with the placement of the shapes and colors until you find the perfect place for each one.
